ORGANIZATION CHART

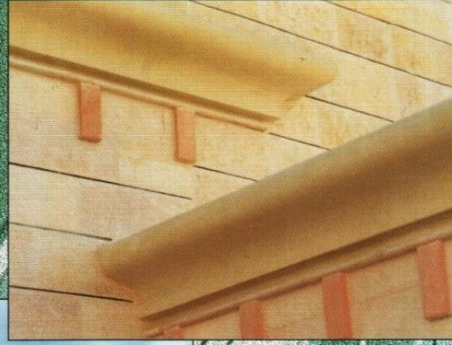

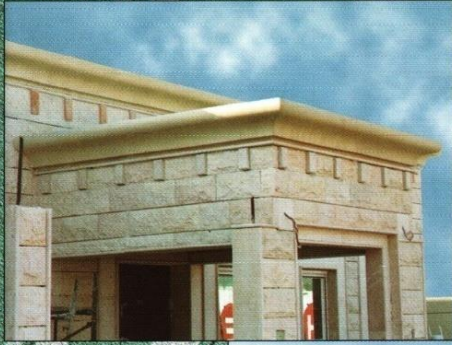

Tensile Shade structure is a material which today is making a significant contribution to the economics, to the technology and to the aesthetics of the construction industry worldwide.

This environmentally friendly composite, with its low consumption of energy and natural raw material, is being formed into a great variety of products and has won firm friends amongst designers, architects, engineers and end users for its flexible ability to meet performance, appearance and cost parameters.

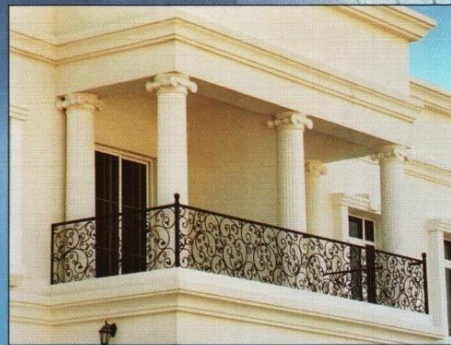

“Cool shade Provides the architect with an end product range that no other material can match”

- Light weight, ease and speed of handling, with reduced erection and transport costs.
- Reduced loadings on building leading to substantial reductions in structural and foundation cost, especially useful for building renovation or restoration.
- Ability to reproduce fine surface detail.
- Low maintenance requirements.
- Good freeze-thaw resistance.
- Low permeability.
- Excellent fire properties.
- Environmental acceptability.
